Meeting Minutes

Menu

We had 2 meetings during the 5th week. One was a face-to-face meeting with you as the customer. Product Owner and Scrum Master were there to discuss on the current progress of the project and showing the initial layout of the website. The 2nd meeting was done via Facebook group chat. All members contributed except Tony.

Server Set-up

Menu

We set up the web server via Amazon Web Services. The server runs Ubuntu. We will eventually put all our code there but for now we have it running locally. However, the main homepage layout is up as seen in last week's deliverables.

Additional Notes

Menu

During this week we worked on the login page and the leaderboard portion of the game. We also set-up a web server where all our pages and code will eventually be on a server instead of the current local server.
